

Lead-In Edge Rulers

Based on the objectives in the *2007 MS Mathematics Frameworks – Revised*, students in grades 3-8 will be required to use a ruler on some mathematics items.

The MDE is recommending that students are familiar with using 12” lead-in edge rulers with both English and Metric measurements.

The image below is only to illustrate the starting points of a standard ruler and a lead-in edge ruler.

Standard ruler - measurement starts at the edge of the ruler; no indented line or definite point to start measurement.

Lead-in edge - measurement starts at the first line or definite starting point, not at the edge of the ruler.
